TECH

- HOSE POWER RANGE 0.5 HP TO 50 HP
- TANK SIZE 25 LTR TO 1000 LTR
- SOLINED VALVE SIZE 01 , 03 , 06 , 10
- MANIFOLD 1 STATION TO 12 STATION
- PRESSURE RANGE 20 BAR TO 700 BAR
- TANK MATERIAL MILD STEEL & STAINLESS STEEL
- WITH AIR OR WATER OIL COOLER
- OPTIONAL ACCUMLATOR
- OPTIONAL PLC OR ELECTRICAL PANNEL

OUR CLIENTS

About Us

We are a specialized manufacturer of high-quality hydraulic cylinders and hydraulic power packs, serving diverse industrial and mobile applications. With years of engineering expertise, we are dedicated to providing robust, reliable, and performance-driven hydraulic solutions that power our clients' most demanding operations. Our commitment extends beyond manufacturing to offering customized designs, ensuring every product—from heavy-duty cylinders to compact power units—meets the exact specifications and quality standards required for maximum efficiency and longevity.

We are your trusted partner in precision fluid power.

WHY CHOOSE MAKTECH

Choose us for your hydraulic actuators and hydraulic power pack needs because we deliver uncompromising reliability and peak performance engineered for the toughest industrial demands. Our actuators are precision-machined for maximum force density and long service life, ensuring accurate and powerful motion control. We integrate these with custom-designed power packs that feature energy-efficient pumps and advanced filtration systems, maximizing uptime and minimizing maintenance costs. By selecting our integrated solutions, you benefit from a single source of expertise, dedicated support, and products built to endure, ensuring your machinery operates with superior efficiency and sustained power.
